The Center for Infrastructure Assurance and Security

Since its founding in 2001, the CIAS has focused on three core competencies working to improve the overall security of state and community infrastructure.

Core Competencies

- **Cyber Security Exercise Programs**
  Communities and states all across the nation have participated in exercises, seminars and associated workshops designed and facilitated by the CIAS.

- **Cyber Security Training**
  Whether at your location or in San Antonio, our skilled training staff provides interactive ways to learn.

- **Cyber Defense Competitions**
  Future security professionals at both the high school and collegiate levels test their skills in an intense series of events focused on defensive cyber strategies.

The vision of the CIAS is to lead the advancement of state and community cyber security capabilities and collaboration. The cyber security postures of communities, states and our nation are strengthened through this multi-faceted approach.

About the Program

In cooperation with the Department of Homeland Security (DHS), the CIAS will conduct two community-based cyber security exercises in two separate communities, and one state and community exercise. These exercises will emphasize the importance of protecting cyber infrastructure, information sharing and no and low-cost solutions.
