I am ...

{still}

Waiting for Divine Intervention.

Do your part to contribute to cyber security:
Lock your computer screen,
Keep your data protected, and
Practice proper operational security.
I am ...

Picture of Confidence.
You may think everything is safe and secure until your network is breached.

Stop an attack before it starts by acknowledging the problem and working to correct it.
Way to Protect Your Information.

Information is easy to steal when it is easy to get. Store sensitive information in a locked container and shred anything no longer needed.
I am ... 

{not}

An Auditor or Investigator.
A single phone call is all it takes to steal information.

Never provide your password or other sensitive information over the phone or in an e-mail.
